person in our behalf? Believing that the circulation of the Democrat may be materially extended, we make this appeal to our friends in its behalf. The New York Times, one of the ch'ef Republican organs of New York, lays the whole blame of the defeat of its party on Abraham Lincoln. He has not accomplished enough in putting down the rebellion. That is the great cause. "Whom the

gods intend to destroy they first make mad.' The radicals will not look at the real cause. which all the world sees, except themselves. They are too much "nigger." The white man is disgusted with the whole business. The radicals have but one ideathey have gone all lengths on that; and if the people sgreed with them, nothing could have expelled them from the high places of the Government. It was the ominons outgivings of the Administration upon the everlasting negro question, the negro complexion of all the proceedings of Congress, that overwhelmed the radical party.

Beside that, there was a recklessness o the old land-marks of the Constitution so manifest in the radical press that it alarmed the people. The impression became general that this radicalism could not be trusted. The idea that the rebellion was to be put down by violent and unconstitutional expedients that would involve scenes of horror without a parallel, startled the visioial Governor.

The masses are resolved to sustain the Government and put down the rebellion. The direct way to do it is to break down by military force the armies of the rebellion. These latter stand in the way of the enforcement of the Federal Constitution and laws, and these only are in the way. When they are defeated and broken down crow-bar. the work is done. Then the policy is preservation, not destruction. It is the will of the people that not a right is to be infringed, either of persons or property. If any are, it must be in accordance with the laws of war and our own organic laws. State Constitutions and State laws are as dear to the people of this country as the Federal Constitution and Federal laws. But, accord- Alabama. ing to indications, State rights seem to be forgotten at Washington, and the limits of the Federal Constitution entirely ignored.

By a proclamation of the President, slavery was to be abolished in States and parts of States, and that not by due process of law, but by arbitrary and lawless power. That is not all, or even the worst; by auother proclamation the right of trial by jury in certain cases is abolished, and the President may, by his construction, bring any act under the specified cases, and no couldn't we swap that "old Buck" off for appeal from his arbitrary dictum would be a rain? allowed. This may not be intended, but so the proclamation reads. Is it any wonder that the people of this country have administered a rebuke to all this? Loyal men will not judge harshly of acts done occasionally, under pressing necessity, in localities where the civil authorities are powerless or disloyal; but when despotism seems to be growing into a system, and edicts from the Presidential mansion subverting State laws and Constitutions are put forth, it is

The radicals will not see this. They consequently, will assume, not that their cherished ideas are condemued, but that the incidentals are at fault. They blame the President; but he is embarrassed by them, and so is the military power of the Union. We can assure them that the rebellion can be put down and will be put down, but not upon their programme. The all its props and supports. We can't restore the civil power by trampling civ.l

The people have decided for the original programme of putting down the rebellion the one solemnly announced by the President and by Congress. The people see that this programme is departed from and they have condemned it and the guilty au-

The editor of the New York Times says, "the people of this State are thoroughly loyal to the Union and the Constitution. They desire and demand that the rebellion shall be crushed." That is true, and it is the reason they have voted down the editor and his party. St. Louis, Nov. 7. About one o'clock yesterday morning, when ten miles above Si. Genevieve, the steamer J. II. Diekey exploded one of her boilers, killing and wounding several of he passengers and crew. The passengers were awakened by violent shocks, and rushing from their rooms, found that the boat had ruu against the bank, lay west end in the mud. In about fifteeu minutes, while the passengers were still wandering about the cabin, not yet recovered from the first alarm, another terrible shock shook the whole boat, and the forward cabin was instantly filled with sealding steam.

Numbers inhaled it, and fell dying upon the floor, while other passengers, among whom were several ladies, rushed in a panto the calamity by fire breaking out in the state rooms, and through the floor above boilers communicated from the furnaces. After long and earnest exertion this was onquered. All unite in praising captain Murrellman for his bravery and judgment. The cause of the explosion remains un-certain—the engineer stating it to be from the shock on the boat striking, disarranging the boiler, while others maintain that the latter was old and defective. The

pilot states that the cause of the versel's going down so suddenly, was from the signal to back water being misunderstood as the one to go ahead, Among the killed is Lieutenant F. Dodge, of the Sixth United States Cavalry of Philadelphia; Henry Eacher Clayk depressions and the called Search ton, clerk, dangerously scalded. Several persons are known to have been blown verboard, and others jumped into the river in the panic and were drowned. At eight o'clock the next morning, the steamer Warner came along, and brought the Dickey's passengers and crew to this eity.

WASHINGTON, NOV. 7. Postage-stamped envelopes were first inoduced into this country in the year 1853, and although offered at prices far below that of the ordinary envelopes of the trade, they o not as yet seem justly appreciated by the public. There has been but a slight variaion in the number of stamped envelopes issued annually. In 1854 it amounted to \$261,386; in 1858, \$237,571 50; in 1858, \$307,342 75; in 1861, \$200,273—the latter being less than l'aper cent. of the issue of

separate postage stamps, which increased from \$55,000,000 in 1854 to \$211,000,000 in The greater cheapness of Government enelopes, as compared with those of the trade s generally overlooked, because the purchaser of the tormer is required to pay the additional charge of postage. One hundred envelopes are sold for \$3 18, while the same number of plain envelopes, of F. H. GIBSON, 40 cents. But to this sum must be added \$3, the value of the postage stamps which imilar quality, may be procured for about must be affixed to such cuvelopes, before they can be used in the mails, thus making Capitol Drug Store, opp. Postoffice, 100 letters cost \$1.40, or 22 cenis more than when conveyed by Government envelopes.
